- Cash control
- Registration, cost control and profit margin per item

Allergens

Check the food allergens of the products on the selling screen and inform the costumers at the moment of the sale.

Integrates card payment

Connect HIOPOS with your PinPad to allow payment by card. Accelerate your sales and avoid mistakes when you enter the amount manually.

Prepare your recipe of your products

Define the composition of each dish, having a control on the cost and the stock of the goods. Define the retail price of the dishes according to their production cost.

Centralize all the information of your business

HIOFFICE Lite is the web application which allows you to configure remotely and centrally one (HIOFFICE LITE) or several business (HIOFFICE PREMIUM).

Orders delivery

Improve the order delivery by sending to the customer an electronic receipt with a QR code, this will help to identify each order at the moment of the delivery.
