Nombre del artículo

1234567890128

With HIOPOS you can configure different label printing designs and associate them with your products. This way you can automate barcode creation with our self-generation functionality.

Stock management

Organize, plan and control stock with purchasing and inventory control tools.

Sell your products by weight

Connect HIOPOS with your scales and automate the sale of your products by weight.

Remote control and centralization

Configure and manage one or more establishments remotely and centrally. Receive in real time all sales, cash closings, etc., update centrally your products, prices, offers and control the stock in the warehouse.

Autonomous purchasing experience

SelfQuiosk solution allows the end-user to make the purchase autonomously. The visual and intuitive screen guides the customer through the entire purchase process.
